Computer Science Engineering

SUMMARY

Motivated Computer Science student with strong foundation in programming, full stack development, and machine learning. Experienced in building AI-enabled applications and real-world systems using Java, Python, and React.js. Worked on Generative AI-based projects including AI-powered assistant systems and Android applications. Interested in developing scalable AI-driven solutions and improving user-focused software systems.

TECHNICAL SKILLS

Languages: Java, Python, C

Frontend & Backend: HTML, CSS, JavaScript, React.js, Node.js

Database: MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, OS, Networking

Tools: Git, GitHub

PROJECTS

TripGen AI – AI-Powered Travel Planning & Assistant System

Developed an AI-powered travel planning and assistant system using Google AI Studio to generate personalized day-by-day itineraries based on structured inputs such as destination, duration, budget, and preferences. Designed multi-step workflows to collect inputs and generate context-aware outputs including activities, food recommendations, travel tips, and budget insights. Implemented a conversational AI assistant to handle dynamic user queries with context-aware responses and improved user interaction through structured prompt design.

Kreeda Ankana – Android App using Generative AI

Built an Android application for sports ground booking and challenges using Jetpack Compose, enabling users to book time slots, post challenges, and track scores. Implemented data persistence using DataStore and managed UI state using Kotlin Flows. Explored integration of Generative AI tools to enhance user interaction and improve application features.

Data Privacy in Cloud using LDP

Implemented data privacy in cloud computing using Local Differential Privacy (LDP) to ensure secure and privacy-preserving data sharing. Focused on protecting sensitive information while maintaining data usability in distributed systems.

Open Elective Choice System

Designed and developed a web-based portal using HTML, PHP, and MySQL for student elective registration and management. Implemented backend logic and database handling for efficient system functionality.

EDUCATION

Bachelor of Computer Science (08/2022 – 05/2026)

B.L.D.E.A's V.P. Dr. P.G. Halakatti College of Engineering and Technology, Karnataka, India

CGPA: 7.0 / 10

Pre-University (06/2019 – 05/2021)

Excellent PU Science College, Vijayapura, Karnataka, India

Percentage: 72%

ADDITIONAL INFORMATION

Soft Skills: Teamwork, Leadership, Effective Communication, Adaptive, Critical Thinking

Languages: English, Hindi, Kannada

Certifications:

- What is Generative AI? – LinkedIn Learning (Nov 2025)
- GenAI Powered Data Analytics Job Simulation – Tata Forage (Nov 2025)
